

## Did you know...

Your water can become contaminated if connections to your plumbing system are not properly protected!

The purpose of the local Cross-Connection Control Program, as required by State Plumbing Code and Regulations, is to ensure that everyone in the community has safe, clean drinking water.

## Public Health & Safety....

To avoid contamination, backflow preventers are required by state plumbing codes wherever there is an actual or potential hazard for a cross-connection. The Wisconsin Department of Natural Resources requires all public water suppliers to maintain an on-going Cross-Connection Control Program involving public education, onsite inspections, and possible corrective actions by building owners if required.

## Residential Water User Cross-Connection Hazards

### Bathrooms & Kitchens

In lieu of inspecting your kitchen and bathrooms, the Kewaunee Water Utility is providing this informational brochure to assure that the water within your structure and throughout the public water supply is safe.

We're All Connected.....

Maintaining the integrity of your  
public drinking water system.
